

LYSOL

B.P.

This preparation has been approved by the Minister of Agriculture, Fisheries and Food and the Secretary of State for Scotland as a disinfectant for the purposes of the Diseases of Animals Act and Orders made thereunder for use in the proportion of one part of this preparation to 49 parts of water.

The contents of this receptacle are hereby guaranteed to be of the same quality and composition as the sample which was submitted to and examined by the Government Chemist, upon which the said approval dated 2nd March, 1955 is based.

DIRECTIONS FOR USE

DO NOT USE UNDILUTED

For clean wounds, for sterilizing instruments, and for antiseptic purposes in internal operations.—One teaspoonful of Lysol to one pint of water.

N.B.—When surgical instruments are KEPT in Lysol, a solution of not less than 10% must be used.

As a douche.—Use one teaspoonful to three pints of warm water.

For infected wounds, general skin disinfection, and for your own hands.—Two teaspoonfuls of Lysol to one pint of warm water.

Midwifery.—For the hands, two teaspoonfuls of Lysol to a pint of water. For the mother for external use, half this strength.

For cleansing infected linen and for disinfecting and cleansing sponges.—One tablespoonful of Lysol to one pint of water.

For bed pans, closets, drains, sinks, sputum flasks, etc.—Two tablespoonfuls of Lysol to one pint of water.

NOTE

One fluid ounce or two tablespoonfuls of Lysol mixed with a pint of water makes a 5% solution.

Corrosive; Causes burns. Avoid contact with eyes, skin and clothing. Drench accidental splashes with water and get medical advice. For eyes give prolonged irrigation and get medical attention immediately.

Keep out of the reach of children.

POISON: NOT TO BE TAKEN
