

Here's what puts Suffolk ahead in the Power Game.

Suffolk means 4-stroke power.
4-stroke power that's self-propelled. Lets you cut tough grass or fine grass with equal ease.
4-stroke power that starts easily, effortlessly.
4-stroke power in a mower that's so well-engineered, and so full of useful features, you'll marvel at the price.
And they're fully guaranteed.

Suffolk Super Colt

A sharp 12" Sheffield cut for average size lawns.
More cuts-per-foot give an expert finish to a lawn and the Dual Drive gives perfect control when mowing around edges and borders with the neatness of a master barber.
With a large grass box to leave your lawn tidy, automatic clutch and recoil starter, aluminium die-castings that strengthen and lighten, the famous Suffolk 75 G 4-stroke engine and Suffolk's ingenious one-piece bottom blade assembly.

All that for only **£26.10.0** complete.

Larger lawns succumb just as fast, just as easily, to the six 14" Sheffield blades of the

Suffolk Super Punch.

The microset hand adjuster lets you accurately choose whatever height grass you want. That's the low-priced Suffolk Punch. **£31.17.6.**

Big lawns benefit from the wider cut of the 17" Super Punch. Yet it's as easy to turn as the 14"! **£45.0.0.**

Suffolk lawn mowers are products of Birmid Quilcast (Home & Garden Equipment) Ltd - the largest lawn mower manufacturers in the world.

Suffolk is Four Strokes ahead in the Power Game.

June in the garden with ICI

Enjoy the lawn of your dreams with the 'Plus' Lawn Spreader

The 'Plus' Lawn Spreader enables you to treat your lawn easily and accurately. You just fill it with any of the three ICI lawn care products and wheel it over your lawn - it's as simple as that. The usual price for the 12" model is 45/- and you can get a 6/- refund through the ICI Garden Savers' Plan.

Now in June your lawn should be growing well. Keep it like this by using Lawn 'Plus' in the Spreader because there is always something bent on spoiling it, like the unsightly weeds that steal the foods meant for the grass. Lawn 'Plus' is prepared in the unique form of mini-granules; each mini-granule is a balanced food in an organic base, impregnated with two selective weed-killers to kill most lawn weeds. In one operation, you can clean up the lawn and get the grass growing green and healthy again.

If you have fed the lawn already and just want to deal with any remaining weeds use 'Verdone'. It gets down to the root of the lawn troubles by selectively killing most lawn weeds, roots and all, including stubborn clover. Choose a still, warm day between now and early September and water on to the lawn with a watering can using just 1½ table-spoons to 2 gallons of water.

Get the very best out of your roses by protecting them from diseases. Remember diseases must be prevented not cured and even though your roses may be disease-free at the moment, ensure that they are adequately protected with General Garden Fungicide.

It contains thiram and is effective against blackspot, mildew and grey mould. Spray the plant thoroughly including the stems and the underside of the leaves.

This month's gardening hint. Roses come into their own this month. To ensure a good second flush prune back the

spent flowers to just above a bud. Follow this up by applying Rose 'Plus' to the bed.

Magnesium is an important element in the life of a rose. Without it, growth is weak and the leaves will turn yellow. If you just apply soluble magnesium though, it is often washed away through the soil and doesn't get a chance to do its job. So a unique form of steady release magnesium has been developed in 'Enmag'. You will find it in Rose 'Plus' along with the other essential foods - nitrogen, phosphate and potash.

(*Enmag' is a trade mark of Scottish Agricultural Industries Ltd.)

If the windscreen of your car is spotted with flies you can be sure that greenfly are on the move. Before they attack your flowers and vegetables spray them with 'Abol-X'. It contains menazon which is absorbed into the sap stream to keep plants free of those sap-sucking pests - for up to one month. Its long last-

ing effectiveness makes frequent spraying unnecessary. In addition, 'Abol-X' can be mixed with General Garden Fungicide to make a combined spray against both pests and diseases.

Don't let weeds flourish! By now the many people who have already been using 'Weedol' will be beginning to appreciate it fully. Containing ICI's discovery, paraquat, which kills weeds without harming the soil, it is so easy to use. Just fit a sprinkle bar to your watering can or use the special applicator and simply water the 'Weedol' on to the weeds, (except on lawns). Use it whenever new weeds appear. Now, thanks to 'Weedol' weeding is no longer the time-consuming, back breaking job it used to be.
