

Stand up to weeds!

Come on gardeners - you've bowed down to weeds long enough. No matter how much you grub around and hack away you make it easier for them to grow again.

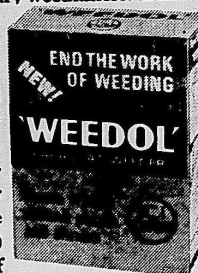

So stand up to weeds - use the 'Weedol' technique.

This is ICI's revolutionary new way to keep your garden free of weeds - you simply "water" them away. 'Weedol' is completely different from ordinary weedkillers. It kills only what it touches and becomes harmless on reaching the soil.

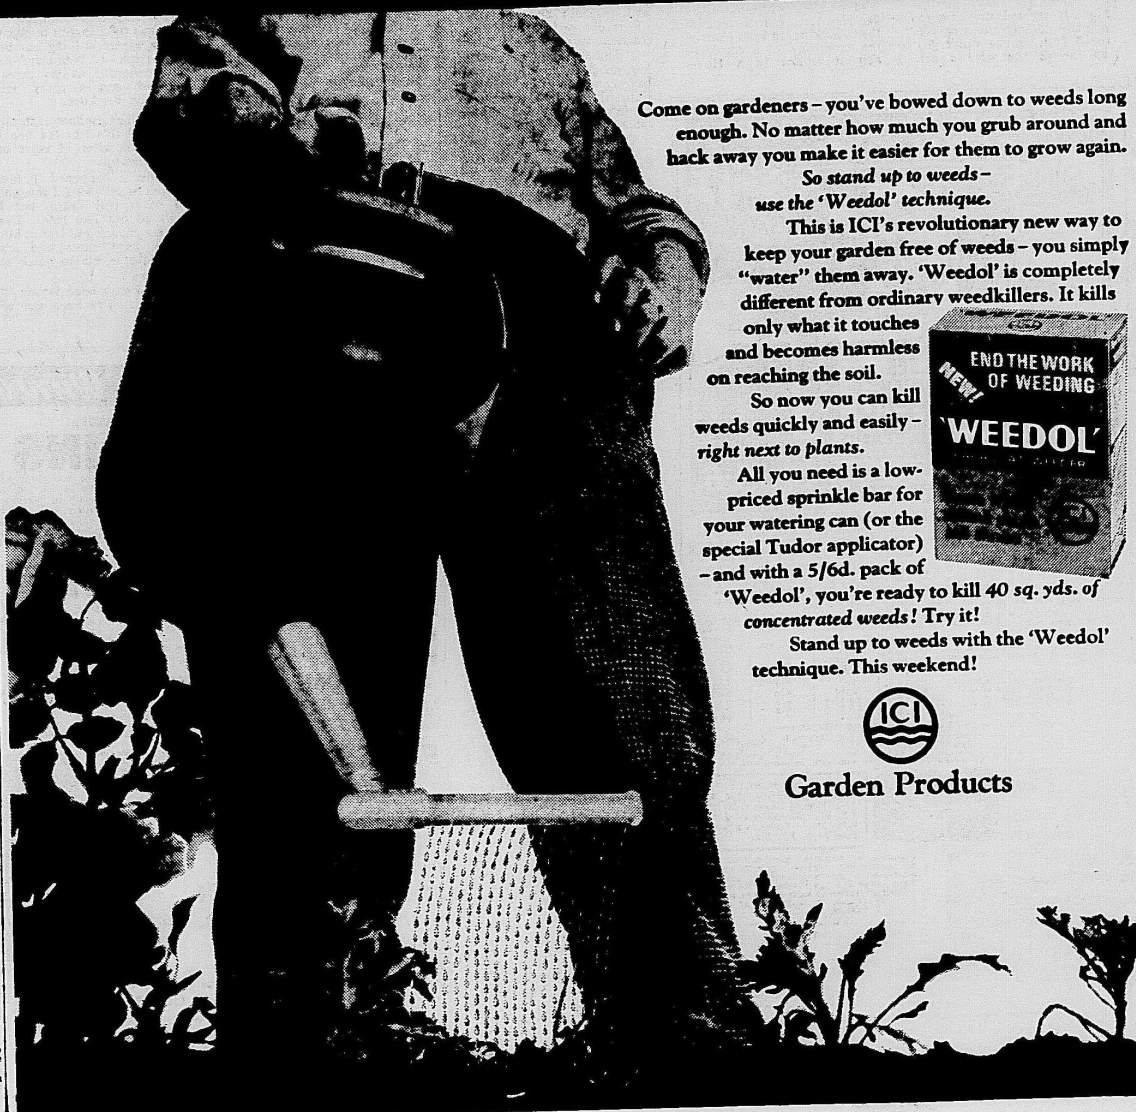

So now you can kill weeds quickly and easily - right next to plants.

All you need is a low-priced sprinkle bar for your watering can (or the special Tudor applicator) - and with a 5/6d. pack of 'Weedol', you're ready to kill 40 sq. yds. of concentrated weeds! Try it!

Stand up to weeds with the 'Weedol' technique. This weekend!
