## PINE DISINFECTANT

$\frac{1}{2}$  GALLON

40p

### THE LINE

The market for Pine Disinfectants has increased considerably in recent years and now represents an annual usage of nearly 10 million gallons! This is an obvious line for a JUMBO size and this new  $\frac{1}{2}$  gallon pack, at a competitive price, will be a big seller during the peak spring and summer selling period.

This pack replaces the 1 gallon drug pack, which is now discontinued. Outstanding orders for the 1 gallon pack will be met with the new  $\frac{1}{2}$  gallon pack on a one-for-one basis.

### SUPPLIES

There will be a distribution of stock. The automatic distribution and recall system will **not** be used. The quantity you will receive is shown on the enclosed allocation advice. If you wish to amend this quantity up or down, mark the revised quantity on the allocation advice and return it to D.P.C., Nottingham, within the next seven days.
