## GARDENING

### Another chance to buy special-offer greenhouse

The three-door Marley.

THE cold, wet spring has proved the value of a greenhouse for sowing seeds when conditions outside make it impossible.

Every gardener needs a greenhouse — for raising early vegetables and bedding plants, growing pot plants, cucumbers, tomatoes and chrysanthemums.

But there isn't always the space. That problem is solved by the ingenious Marley Plantmaster greenhouse that fits against a wall. It will fit the smallest garden. You could put it on a patio or even the balcony of a flat. Because it fits against a wall it gets extra reflected warmth. And it has more growing space than the conventional greenhouse because you work from outside through the sliding doors.

Here is another chance to buy it at a special cut price.

We are offering two sizes: one 5ft. wide with two doors, the other 7ft. 6in. wide with three doors. Both are 2ft. 5in. deep,

5ft. 1in. high at the back and 5ft. 1in. high at the front. They are made of no-rust no-maintenance aluminium and glass.

The two-door version is £72.50 with aluminium shelving trays. This is £10.35 off the catalogue price. It costs £62.65 — £16.10 off the catalogue

price. The three-door version is £81.10 off the catalogue price.

## Stop weeds going to bed with your flowers.

It's disgraceful. You cultivate a beautiful bed of flowers and then the minute you turn your back, weeds leap in uninvited.

Yet to get rid of them is easy. Use 'Weedol', the unique weedkiller from ICI made with paraquat and diquat.

'Weedol' kills weeds without affecting your soil. Yet once it's watered onto weed foliage, even rain won't wash it off. So why not destroy weeds the effective way with 'Weedol' and let your flowers come smiling through!
