

## SPECIAL OFFER OF RASPBERRIES /LOGANBERRIES

Mid-season raspberries succeed in most areas of the British Isles. There are two reasons why they are such an invaluable garden crop: firstly, mid-season raspberries are one of the quickest fruits to start cropping after planting, beaten into second place only by strawberries. Secondly, since the raspberry flowers later than most fruits, it is much less likely to suffer frost damage. Given healthy plants, there is a very good chance of obtaining heavy regular crops from a small area for several years.

THIS OFFER CONSISTS OF A SUPER NEW SUMMER FRUITING CULTIVAR BRED AT EAST MALLING RESEARCH STATION AND NAMED MALLING ADMIRAL. This raspberry is an exceedingly valuable mid-season variety with superior fruit size and quality. The flavour is excellent and apart from being a superb dessert variety, it is highly rated for jamming and freezing. It has resistance to spur blight, cane botrytis, and the nematode borne virus.

A SMALL CROP WILL BE PRODUCED ON THE EXISTING CANES THIS JULY. THE CANES ARE CERTIFIED BY THE MINISTRY AS 'SPECIAL STOCK'.

FREE WITH EACH PACK OF RASPBERRY CANES WILL BE INCLUDED A THORNLESS LOGANBERRY. Capable of yielding 10/15 lbs. of delicious berries annually in July/August, not forgetting the abundance of pretty white blossom.

## REVOLUTION in the GARDEN ? - Now transplant root crops safely with the NEW Sow-Easi

Harvest rootcrops weeks earlier. No more seed or time wasted thinning out, no weeding, no loss from frost or disease.

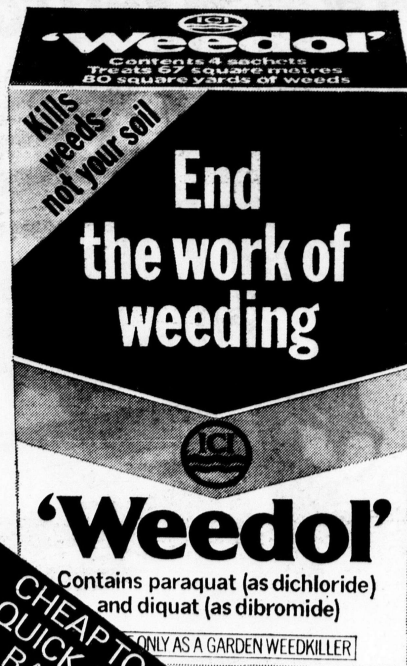

At last, with Sow-Easi revolutionary troughs, you CAN raise rootcrops safely (carrots, celeriac, beetroot, etc.) in the greenhouse, coldframe, utility room or window sill, and transplant them safely with NO root disturbance. Simply place Sow-Easi trough halves (1) on stand, fill with earth and sow your seeds (2). When plants are ready, place trough in V-shaped furrow in ground and slide out trough halves (3). Sow-Easi troughs also improve healthy growth of all other plants from seed.

Only £4.85 (Price incl. p.p.p. & VAT)

Each pack contains 6 trough halves, 3 stands, spacing pegs & simple instructions - over 6' of trough space. Only from Mercatstyle Products Ltd., Dept 28, Lynn Ind. Est., Harpsing Lane, Watford, Herts.

# Weedol about it.

### How 'Weedol' Works

'Weedol' contains two ICI discoveries, paraquat and diquat which have revolutionised weeding. With 'Weedol' you can weed the garden quickly and easily without hours of hoeing and hand weeding. Just wet the weeds and not the plants. As 'Weedol' is made completely harmless on contact with the soil it does not interfere with planting, sowing or future growth and there is therefore no danger to the roots of untreated plants.

'Weedol' kills weeds by affecting their normal development. Instead of producing growth, with the help of sunlight, treated weeds wither and die.

**How to use 'Weedol'**  
Dissolve the contents of one sachet in 4.5 litres (1 gal) of water (the granules will dissolve more quickly in warm - not boiling water). This quantity will treat approximately 17 square metres (20 square yards) of weeds.

Apply the solution to weeds using a watering can fitted with an ICI Sprinkle Bar. This fits most watering cans and enables you to wet the weeds and avoid cultivated plants. **Where to use 'Weedol'**  
Use 'Weedol' anywhere in the garden but NOT ON LAWNS.

Imperial Chemical Industries Limited, Garden Products, Farnham, Surrey GU14 7UB

In the vegetable garden between the rows.

In flower borders and around soft fruit.

Ground preparation prior to planting.

Apply only by watering can fitted with an ICI Sprinkle Bar

### PRECAUTIONS

Keep off skin  
Wash off splashes immediately  
Wash after use  
Keep pets off treated areas until dry  
Store in a safe place away from children and pets

WASH OUT WATERING CAN THOROUGHLY AFTER USE  
See sachets inside for further details

Take pride in your garden.
