

How much do you know about housekeeping ?

EVEN the most expert housewives are always on the look out for new ideas. Read the statements below. Mark whether you think they are true or false. There's some useful information in them.

Sponges should be cleaned with ammonia and hot water

TRUE? ☐ FALSE? ☐

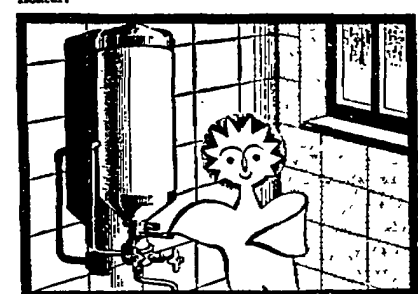

To clean a sponge, add a tablespoonful of ammonia to a quart of hot water and soak sponge for an hour. Squeeze dry; put a teaspoonful of ammonia in fresh hot water, work the sponge about in this, then rinse in cold. This is another of the innumerable things for which hot water is needed and can so easily be had from a gas water-heater.

The bristles of brushes should always be wiped after washing

TRUE? ☐ FALSE? ☐

Bristles should never be wiped or washed with soap as it makes them soft. Dissolve a knob of soda in boiling water. Dip the brushes in and out until bristles look clean. Rinse in cold water, shake well and dry in the sun or near a fire. Little jobs like this are easily and quickly done in the house that has a gas water-heater.

A few pence weekly can banish drudgery

TRUE? ☐ FALSE? ☐

The answer is "TRUE!" For a few pennies a week you can own a GAS Water-Heater for sink or basin. Bath Heaters too are offered on easy terms. They will give you streams of hot water instantly — without waste — just by turning a tap. Ask all about them — without obligation at your local Gas Showrooms to-day.

Send for this free book now!

This book can end your biggest housekeeping worry — shortage of hot water on tap. There's a modern type of gas heater for every household — and this new book shows you just how amazingly cheap it is for you to own one. Send now.

To the British Commercial Gas Association,
 Dept. 43C, Gas Industry House, 1
 Grosvenor Place, London, S.W.1. Please
 send me free your new book that will banish
 my hot water problem.
