

The WORLD of WONDER

10,000 THINGS EVERY CHILD SHOULD KNOW

The most practical book of general knowledge ever published. Written in simple language, illustrated with the most remarkable collection of explanatory drawings, photographs and pictures ever brought together.

This wonderful work has cost thousands of pounds to produce and yet less than a penny a day will buy it. Money could not be invested better. It is as interesting to grown-ups as it is to children. It explains so many things that everyone should know in such a fascinating and simple way.

No intelligent child who glances inside Part I of this unique work will be able to resist its fascination. There are long articles and short articles, paragraphs, pictures and diagrams, a profusion of things to make at home, experiments which can be done with just the ordinary things of everyday life and without spending a penny.

It explains the why and wherefore of natural happenings, how man has tamed the powers of nature, and how the many marvellous machines which he has invented are made to work, it shows the marvels of the plant and animal world; the wonders of geography and geology are explained in new

and striking ways. The interest of THE WORLD OF WONDER is endless.

Wonderful explanatory drawings are given showing the workings of such mechanical wonders as a locomotive, a turbine steamer, a Diesel engine, a fire engine, a fire escape, a sewing machine, a track engine, a paddle steamer, a modern boiler, a gas engine, a gas meter, and so on.

We all use and enjoy the wireless and the gramophone and the cinema. But how many of us know exactly the way in which these things work? This book, by its wonderful and carefully worked-out picture diagrams, many of them full pages or double pages, makes such matters simple and clear to all.

The weekly parts of THE WORLD OF WONDER can be bound up at home simply and neatly as they are issued by means of a special Self-Binder which is offered to subscribers at a very low cost. Alternatively the complete set of parts can be bound in the ordinary way when the work is complete.

A few of the thousands of things that are explained in
THE WORLD'S WONDER:

CHEMICAL EXPERIMENTS	MYSTERIES OF THE MOON
HOME MECHANICS	HOW EARTHQUAKES ARE CAUSED
HOW WE SMELL	WHY VOLCANOES ERUPT
HOW WE TASTE	THE MYSTERY OF THE WAVES
SIMPLE EXPERIMENTS WITH AIR	WHY THINGS FLY
OPTICAL ILLUSIONS	SECRETS OF THE SUN
HOW BROADCASTING IS DONE	DIFFERENT KINDS OF STARS
MARVELS OF MACHINERY	MYSTERIES OF BALANCE
WONDERS OF ANIMAL LIFE	LIFE IN PAST AGES
WONDERS OF PLANT LIFE
