

What will she do ?

PROBABLY dash through the flames and become a casualty herself. Too far to go for water; it would take too long to get even a pailful which would be of little avail.

If only she had a Pyrene Extinguisher on the landing! No excitement. No delay. Her plan of action clear. A few strokes of the pump and the flames would be defeated at the start. Children, self, and home saved.

The Pyrene Fire Extinguisher is always ready for emergency. Needs no periodical recharging. Small and easy to operate. Will not damage fabric or furniture. Ornamental as well as efficient. Have one ready on every floor.

Over 2,000,000 now in use.

As used by the Admiralty, War Office, Office of Works, Ministry of Munitions, Fire Brigades, and Leather Manufacturing Firms.

Write to-day for Illustrated Pamphlet.
