

FIRST **in the** **FIELD** with **'GRAMOXONE' W** for pasture improvement without ploughing

'Gramoxone' W helps the farmer rapidly and easily to renew useless pasture on land difficult or impossible to plough.

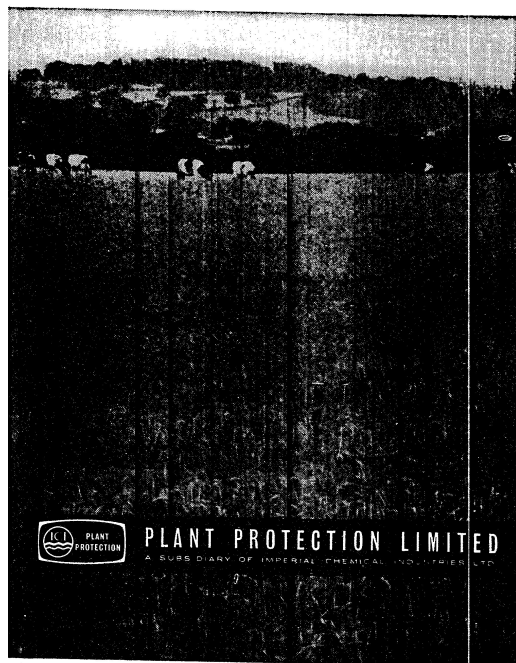

'Gramoxone' W kills grasses and many broad-leaved weeds.

'Gramoxone' W is inactivated by the soil and leaves no residues.

'Gramoxone' W allows new and more productive grasses to be sown straight away with the minimum of surface cultivation and absolute safety to the new grass.

'Gramoxone' W qualifies for the Ministry of Agriculture grants now available for pasture improvement without ploughing.

If you want big savings in both time and cost of cultivations ask your Plant Protection representative about 'Gramoxone' W.
